# SOMENDRA SURYA JAIN

Contact No. - +91-7900585001

E-mail Id. – jainsomendra333@gmail.com

## CAREER OVERVIEW

- 1 year of hands-on experience in **manual testing** of Camera.
- Recently transitioned focus to **Full Stack Development** with strong skills in both frontend and backend technologies.
- Experienced in **HTML, CSS, JavaScript, React.js, Node.js, MongoDB**, and **Express.js**.
- Passionate about building responsive, scalable web applications with clean, maintainable code.
- Quick learner and enthusiastic about new technologies and continuous professional growth.

## SKILLS SUMMARY

**Language:** HTML, CSS, JavaScript, Node.js, MongoDB
**Frameworks:** React.js, Tailwind.css, Express
**Platforms:** Visual Studio Code

## PROJECTS AT FULL STACK DEVELOPER

### 1. Prescripto Project

**Title: - Doctor Appointment Booking App (React.JS, MongoDB, Express and Node.JS)**

**Description: -** This full stack appointment booking system can be used by a doctor or a hospital. Because in this project we have created 3 level of authentication. 1st one is for patients, so that patient can login on the website, book appointment with doctor and manage the booked appointment. 2nd one is doctor login, so that doctor can login and check the appointment and their earning. Doctor can update their profile also from dashboard. 3rd one is Admin Dashboard where admin can manage the appointment and admin can also manage the doctor profile.

### 2. CRUD Operation Project

**Title: - User Management System (React.js, JSON Server)**

**Description: -** Developed a responsive User Management web application using React.js, implementing full CRUD operations with JSON Server as a mock backend. Integrated features such as React Router for navigation, private routing for secure access, and user authentication and authorization to control role-based access. Ensured seamless UI interactions and state management for efficient user experience

### 3. Portfolio Project

**Title: - Portfolio (React.js, JSON Server)**

**Description: -** A modern, responsive portfolio website built with HTML for structure, CSS for styling, and react for dynamic, component-based interactivity. It showcases projects, skills, and contact information in a clean, user-friendly interface.
